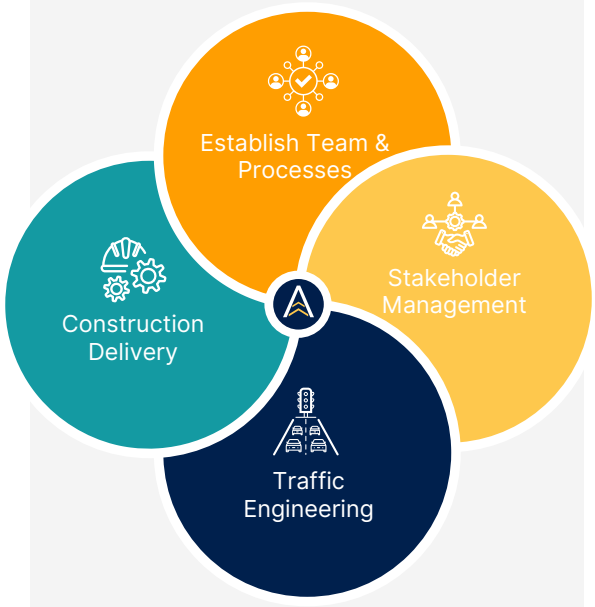
TransIA

Transport Infrastructure Advisory

Capability Statement

Managing the road network during construction



Strategic Leadership & Advisory Services

Transia Pty Ltd was established in response to a gap in the way construction traffic management for major projects is being planned and delivered.

Traffic management is now about strategic road network management - requiring skills and expertise beyond the traditional scope of traffic and transport consultants.

Transia serves both public and private sector clients in Australia. With expertise in major transport infrastructure projects, we provide comprehensive strategic leadership and advisory services in road network management across the Planning, Design and Delivery stages.

Unparalleled experience

- 25 Years in the Traffic & Transport Industry
